

CAROLINE NJOGU

Full-Stack Developer

Nairobi, Kenya | +254737821126 | njogucaroline91@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-stack developer with a Product Design background and completed Software Engineering training at Moringa School. Builds and deploys digital products end-to-end using React, Next.js, Python/Flask, PostgreSQL, APIs, and AI integrations. Founder of Kavaro Agency, a digital product studio, with hands-on experience taking products from user-focused design through development and deployment. Seeking a full-stack developer role.

EXPERIENCE

Full-Stack Developer | NavKids Africa (Remote) | Sep 2026 - Present

- Contributing to the development of a school transportation management platform connecting school administrators, drivers, parents, and students through web and mobile applications.
- Developing the School Admin Dashboard using Laravel and Vue, covering fleet management, driver and vehicle assignments, route and stop management, student and guardian records, live trip monitoring, attendance, emergency management, and reporting.
- Integrating the Driver Application with the platform backend to support trip operations, route progress, student check-in/check-out, location tracking, and offline event synchronization.
- Working with the development team on API integration, role-based access, school-scoped data, and responsive interfaces designed for low-connectivity environments.
- Collaborating within a five-developer engineering team, following a defined API/frontend workstream and contributing to a production-oriented platform involving real-time transportation data and children's information.

Founder & Full-Stack Developer | Kavaro Agency (Remote) | Sep 2025 - Present

- Founded and lead a digital product studio building full-stack web applications and AI-powered solutions for clients, coordinating a small multidisciplinary team.
- Designed and built the agency's website end-to-end using React/Vite and a Node.js/Express backend.
- Built an internal admin dashboard with Flask and SQLAlchemy to track leads, booked calls, and inquiry status.
- Shipped iterative product improvements, including WhatsApp integration and a navigation redesign, based on real user behavior.

FEATURED PROJECTS

NavKids Africa — School Transportation Management Platform

- Production-oriented transportation platform contributing to school administration, driver operations, route management, student and guardian records, live trip monitoring, attendance, emergency management, and reporting across web and mobile applications.

PesaRate — Currency & Travel-Money Intelligence Workspace

pesarate.vercel.app

- Full-stack financial workspace built with React, Flask, and PostgreSQL, combining currency conversion, provider-aware fee estimates, travel budgeting, exchange-rate monitoring, and trend visualization into a single decision-making experience.

Kavaro Agency — Digital Product Agency Platform

kavaroagency.com

- Full-stack agency platform built with React, Vite, Node.js, and Express, with an internal Flask/SQLAlchemy dashboard for managing client leads and inquiries. Designed to combine polished product presentation with practical business operations.

Mood Tracker — Private Personal Wellness Tracker

github.com/caroline568/mood-tracker-app

- Full-stack React and Flask application with JWT authentication and private, user-owned mood tracking, demonstrating secure account-based data management and a clean frontend-to-backend architecture.

Inventory Management System — RESTful Inventory & Product Intelligence API

github.com/caroline568/Inventory-Management-System

- Flask and SQLAlchemy REST API providing full CRUD inventory management, OpenFoodFacts product integration, a companion CLI, and pytest coverage, developed using a feature-branch and pull-request workflow.

Workout Tracker API — RESTful Fitness Management Backend

github.com/caroline568/workout-tracker-api

- RESTful Flask API for managing workouts and exercises, using SQLAlchemy for persistence and Marshmallow for structured serialization, validation, and reliable API responses.

TECHNICAL & PROFESSIONAL SKILLS

Frontend: React, Next.js, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3

Backend & Data: Node.js, Python, Flask, Supabase, PostgreSQL, RESTful API Design & Integration, Authentication (NextAuth/JWT), SQLAlchemy, Marshmallow

Tools & Platforms: Git/GitHub, Vercel Deployments, Render Deployments, Postman, Figma, VS Code

AI & Testing: Generative AI Integration, pytest, Automated Testing

Product Design: UI/UX Design, User Research, UX Strategy, Wireframing, Prototyping, Interaction Design, Usability Testing

Professional Skills: Communication, Problem Solving, Project Planning, Project Management, Personal Productivity, Leadership, Emotional Intelligence, Goal Setting, Self-Management, Entrepreneurship

EDUCATION

Software Engineering Program (Full-Stack) | Moringa School, Nairobi | Feb 2026 - Sep 4, 2026

- Coursework completed; graduation and certificate expected late 2026.
- Intensive full-stack training with emphasis on production-ready development, Agile practices, and real-world project delivery.

Product Design (UI/UX Design) | Moringa School, Nairobi | Apr 2025 - Nov 2025

- Completed hands-on training in user research, UX strategy, wireframing, prototyping, interaction design, usability testing, and user-centered product design.
- Included professional development covering communication, problem solving, project planning, project management, leadership, personal productivity, emotional intelligence, goal setting, self-management, and entrepreneurship.

CERTIFICATIONS

- Generative AI Tools — Moringa School | Mar 2026
- Certificate of Contribution — NavKids Africa | Full-Stack Developer | Sep 2026

ADDITIONAL INFORMATION

Leadership & Product: Founder of Kavaro Agency, a digital product studio focused on web development, product design, and AI-powered solutions.

Languages: English (Fluent – Professional Working Proficiency) • Swahili (Native)

Interests: AI-powered products, full-stack development, product design, digital entrepreneurship, emerging technologies, reading novels, and football.
