

CAROLINE NJOGU

Full-Stack Developer

Nairobi, Kenya | +254737821126 | njogucaroline91@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-stack developer with a Product Design background and completed Software Engineering training at Moringa School. Builds and deploys digital products end-to-end using React, Next.js, Python/Flask, PostgreSQL, APIs, and AI integrations. Founder of Kavaro Agency, a digital product studio, with hands-on experience taking products from user-focused design through development and deployment. Seeking a full-stack developer role.

EXPERIENCE

Founder & Full-Stack Developer | Kavaro Agency (Remote) | Sep 2025 – Present

- Founded and lead a digital product studio building full-stack web applications and AI-powered solutions for clients, coordinating a small multidisciplinary team.
- Designed and built the agency's website end-to-end using React/Vite and a Node.js/Express backend.
- Built an internal admin dashboard with Flask and SQLAlchemy to track leads, booked calls, and inquiry status.
- Shipped iterative product improvements, including WhatsApp integration and a navigation redesign, based on real user behavior.

FEATURED PROJECTS

PesaRate — Currency & Travel-Money Intelligence Workspace

pesarate.vercel.app

- Full-stack financial workspace built with React, Flask, and PostgreSQL, combining currency conversion, provider-aware fee estimates, travel budgeting, exchange-rate monitoring, and trend visualization into a single decision-making experience.

Kavaro Agency — Digital Product Agency Platform

kavaroagency.com

- Full-stack agency platform built with React, Vite, Node.js, and Express, with an internal Flask/SQLAlchemy dashboard for managing client leads and inquiries. Designed to combine polished product presentation with practical business operations.

Mood Tracker — Private Personal Wellness Tracker

github.com/caroline568/mood-tracker-app

- Full-stack React and Flask application with JWT authentication and private, user-owned mood tracking, demonstrating secure account-based data management and a clean frontend-to-backend architecture.

Inventory Management System — RESTful Inventory & Product Intelligence API

github.com/caroline568/Inventory-Management-System

- Flask and SQLAlchemy REST API providing full CRUD inventory management, OpenFoodFacts product integration, a companion CLI, and pytest coverage, developed using a feature-branch and pull-request workflow.

Workout Tracker API — RESTful Fitness Management Backend

github.com/caroline568/workout-tracker-api

- RESTful Flask API for managing workouts and exercises, using SQLAlchemy for persistence and Marshmallow for structured serialization, validation, and reliable API responses.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3,

Backend & Data: Node.js, Python, Flask, Supabase, PostgreSQL, RESTful API Design & Integration, Authentication (NextAuth/JWT), SQLAlchemy, Marshmallow

Tools & Platforms: Git/GitHub, Vercel Deployments, Render Deployments, Postman, Figma (UI/UX Design), VS Code,

AI & Testing: Generative AI Integration, pytest, Automated Testing

Design: Figma, UI/UX Design, Wireframing, Prototyping, User Research

EDUCATION

Software Engineering Program (Full-Stack) | Moringa School, Nairobi | Feb 2026 – Sep 4, 2026 (Coursework completed; graduation & certificate expected late 2026)

- Intensive full-stack training with emphasis on production-ready development, Agile practices, and real-world project delivery.

Product Design (UI/UX Design) | Moringa School, Nairobi | Apr 2025 – Nov 2025

- Completed hands-on training in user research, UX strategy, wireframing, prototyping, interaction design, usability testing, and user-centered product design.

CERTIFICATIONS
